### STYLISH AND SMART series - DISK

In December 2011, ORIENT WATCH CO., LTD. releases DISK, that lends a casual touch to the classic standard style, as the second entry in the new Stylish and Smart series.

The series features the casual taste of young generations combined with the traditional mechanical movement.

The second product in the series is a unique, stylish mechanical watch characterized by a colorful disk movement that slowly changes its expression.

As its name suggests, DISK has a disk-shaped part in its center that takes the place of standard hands to tell the time.

The color of the disk hand changes with the time.

The index has a highly fashionable design with a slit that reveals colors such as green and orange, which stand out against the black case.

The playful, graphical face design gives the model a contemporary presence.
